KSS RECEIVES VOLKSWAGEN GROUP AWARD

STERLING HEIGHTS, Mich., June 26, 2009 – Key Safety Systems (KSS), a leading global supplier of advanced engineered safety products, including inflators, airbags, steering wheels, and seatbelts for automotive and non-automotive markets, received the Volkswagen Group Award 2009 at a ceremony held in the Phaeno Science Center in Wolfsburg, Germany. This award was presented to KSS and 17 other suppliers by Dr. Francisco Javier Garcia Sanz, a member of the Board of Management of Volkswagen AG with responsibility for procurement.

This annual Volkswagen Group award recognizes suppliers that have proved exceptionally successful in meeting the global requirements set forth by Volkswagen, including innovative strength, product quality, competent project management and development competence as well as a working partnership for greater efficiency and environmental compatibility.

During the presentation ceremony, Garcia Sanz commented, “We need strong partners who are competitive on the international stage and have a global presence to jointly safeguard our future. In the present situation, competition is no longer determined by price alone. Apart from financial strength, flexibility in dealing with fluctuating market demand together with supply chain stability are also crucial.”

Jason Luo, KSS President and CEO said, “KSS is extremely proud to receive this prestigious award from Volkswagen AG and we are grateful for the opportunity to continue providing life saving products with superior cost, quality and technology to the Volkswagen Group. Winning this award is a team effort and was made possible as a result of our collaboration and partnership with Volkswagen”

KSS currently supplies airbags, seatbelts, and steering wheels for more than 30 Volkswagen Group vehicles globally and will launch products on several platforms in 2010 and beyond.
